EXAM AZ-900 TOPIC 1 QUESTION 54 DISCUSSION

Actual exam question from Microsoft's AZ-900
Question #: 54
Topic #: 1
[All AZ-900 Questions]

DRAG DROP -
Match the Azure services benefits to the correct descriptions.
Instructions: To answer, drag the appropriate benefit from the column on the left to its description on the right. Each benefit may be used once, more than once, or not at all.
NOTE: Each correct match is worth one point.
Select and Place:

Answer Options	Answer Area	
Disaster recovery	A cloud service that remains available after a failure occurs	
Fault tolerance	A cloud service that can be recovered after a failure occurs	
Low latency	A cloud service that performs quickly when demand increases	
Dynamic scalability	A cloud service that can be accessed quickly from the Internet.

one way to distinguish them is that 'fault tollerance' relates to the time-interval in which the system is not up, while 'disaster recovery' relates to the time-interval after the system has been brought back up. Does it make more sense this way?
