EXAM AZ-900 TOPIC 1 QUESTION 202 DISCUSSION

Actual exam question from Microsoft's AZ-900
Question #: 202
Topic #: 1
[All AZ-900 Questions]

DRAG DROP -
Match the Azure service to the correct definition.
Instructions: To answer, drag the appropriate Azure service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.
NOTE: Each correct selection is worth one point.
Select and Place:

Answer Options	Answer Area	
Azure Databricks		Provides the platform for serverless code
Azure Functions		A big data analysis service for machine learning
Azure App Service		Detects and diagnoses anomalies in web apps
Azure Application Insights		Hosts web apps

Application Insights, a feature of Azure Monitor, is an extensible Application Performance Management (APM) service for

developers and DevOps professionals. Use it to monitor your live applications. It will automatically detect performance anomalies, and includes powerful analytics tools to help you diagnose issues and to understand what users actually do with your app. It's designed to help you continuously improve performance and usability.
