"Azure Security Center" is the answer. It has been renamed to Microsoft Defender for Cloud.

https://learn.microsoft.com/en-us/azure/defender-for-cloud/defender-for-cloud-introduction#cspm---remediate-security-issues-and-watch-your-security-posture-improve
As soon as you open Defender for Cloud for the first time, Defender for Cloud:
- Generates a secure score for your subscriptions based on an assessment of your connected resources compared with the guidance in Microsoft cloud security benchmark. Use the score to understand your security posture, and the compliance dashboard to review your compliance with the built-in benchmark. When you've enabled the enhanced security features, you can customize the standards used to assess your compliance, and add other regulations (such as NIST and Azure CIS) or organization-specific security requirements. You can also apply recommendations, and score based on the AWS Foundational Security Best practices standards.
