Azure DevOps consist in many services: Azure Boards, Azure Repos, Azure Pipelines, Azure Test Plans, Azure Artifacts.
Azure Repos = Azure Repos Source and version control using either Team Foundation Version Control or Git

SilkyS19 3 years, 5 months ago

Correct Answer -A
Azure Repos is a set of version control tools that you can use to manage your code. Whether your software project is large or small, using version control as soon as possible is a good idea.
