EXAM AZ-900 TOPIC 1 QUESTION 334 DISCUSSION

Actual exam question from Microsoft's AZ-900
Question #: 334
Topic #: 1
[All AZ-900 Questions]

HOTSPOT -
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Hot Area:

Statements	Yes	No
Storing 1 TB of data in Azure Blob storage will always cost the same, regardless of the Azure region in which the data is located.	○	○
When you use a general-purpose v2 Azure Storage account, you are only charged for the amount of data that is stored. All read and write operations are free.	○	○
Transferring data between Azure Storage accounts in different Azure regions is free.	○	○

Storage account billing
You're billed for Azure Storage based on your storage account usage. All objects in a storage account are billed together as a group.
Storage costs are calculated according to the following factors:
Region refers to the geographical region in which your account is based.
Account type refers to the type of storage account you're using.
Access tier refers to the data usage pattern you've specified for your general-purpose v2 or Blob storage account.
Storage Capacity refers to how much of your storage account allotment you're using to store data.
Replication determines how many copies of your data are maintained at one time, and in what locations.
Transactions refer to all read and write operations to Azure Storage.
Data egress refers to any data transferred out of an Azure region. When the data in your storage account is accessed by an application that isn't running in the same region, you're charged for data egress.

Is data transfer between Azure services located in two regions charged? Yes. Outbound data transfer is charged at the normal rate and inbound data transfer is free.
