EXAM AZ-900 TOPIC 1 QUESTION 102 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 102

Topic #: 1

[\[All AZ-900 Questions\]](#)

Your company plans to migrate to Azure.

The company has several departments. All the Azure resources used by each department will be managed by a department administrator.

What are two possible techniques to segment Azure for the departments? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. multiple subscriptions
- B. multiple Azure Active Directory (Azure AD) directories
- C. multiple regions
- D. multiple resource groups

the question clearly states "Each correct answer presents a complete solution" so it is basically asking us to outline every way the solution will be reached from Subscriptions to Resource Groups or Resource Groups directly.

Selected Answer: AD

Choices A & D are correct.

A. Multiple subscriptions: Each department can have its own Azure subscription. This allows for isolated billing and resource management, giving each department control over their own resources and costs.

D. Multiple resource groups: Within a single subscription, you can create multiple resource groups, each dedicated to a different department. Resource groups allow you to manage and organize resources based on lifecycle and administrative boundaries, making it easier for department administrators to manage resources specific to their department.

A. Abbonamenti multipli: Questa opzione coinvolge la creazione di abbonamenti separati per ciascun dipartimento. Gli abbonamenti consentono di isolare e gestire le risorse in modo indipendente, consentendo a ogni dipartimento di avere il proprio ambiente di Azure separato.

B. Più directory di Azure Active Directory (Azure AD): Questa opzione coinvolge la creazione di directory Azure AD separate per ciascun dipartimento. Le directory Azure AD consentono di gestire l'accesso e le identità degli utenti in modo indipendente, consentendo a ciascun dipartimento di avere il proprio spazio di gestione delle identità e delle autorizzazioni.

Just so you know when to use what:

if billing granularity isn't a concern and you're more focused on organizing and managing resources, using multiple resource groups could be a suitable approach. However, if you need to separate billing per department, then using multiple subscriptions would be more appropriate.

Selected Answer: AD

A & D

The resource group can include all the resources for the solution, or only those resources that you want to manage as a group. You decide how you want to allocate resources to resource groups based on what makes the most sense for your organization
