EXAM AZ-900 TOPIC 1 QUESTION 356 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 356

Topic #: 1

[\[All AZ-900 Questions\]](#)

**HOTSPOT -**

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

Statements	Yes	No
All Azure services in private preview must be accessed by using a separate Azure portal.	<input type="radio"/>	<input type="radio"/>
Azure services in public preview can be used in production environments.	<input type="radio"/>	<input type="radio"/>
Azure services in public preview are subject to a Service Level Agreement (SLA).	<input type="radio"/>	<input type="radio"/>

- 1) No - Only the preview that impact the UI are accessed from a different portal (not the services)
- 2) Yes - It is absolutely highly recommended NOT to use them in production, but you can if you want (question asks if you CAN, not SHOULD)
- 3) No - No SLA provided for public preview (main reason why it's not recommended for production)

Maybe I'm wrong by for 1) isn't preview portal (<https://preview.portal.azure.com>) different than az portal (<https://portal.azure.com>)?

   upvoted 2 times

  **alexandru\_chirita** 2 years, 11 months ago

<https://preview.portal.azure.com> - the Azure portal service preview (with UI changes in "preview")  
<https://portal.azure.com> - the official Azure portal along with preview services

You never know how dumb the person setting up this question is.

   upvoted 26 times

  **mdstest** Highly Voted  4 years, 11 months ago

I guess you can use it in production but you take a risk since there is no SLA.

   upvoted 34 times

  **Rooks** 4 years, 6 months ago

It is definitely a big risk. What if they make drastic changes during this preview time , what if they discover a huge security hole and if you are already getting used to this preview in prod then that would be very concerning ..

But one can definitely use preview in prod but shouldn't though..

NYN is the answer.

<https://azure.microsoft.com/en-us/support/legal/preview-supplemental-terms>  
Public preview – During this phase we allow any customer with the proper Azure AD license to evaluate the new feature. Microsoft Customer Support Services will supply support services during this phase, but normal service level agreements do not apply.

GA - General Availability is when you should use in production environment.  
Private Preview - Just for testing, available just for expecific access  
Public Preview - Everybody who wants can try it.  
Just GA have SLA.

   upvoted 4 times

  **akp1000** 2 years, 9 months ago

Correct answer is Y,Y,N. Private preview is only available from [preview.portal.azure.com](https://preview.portal.azure.com).

Answer 2 is probably Yes.

But would like them to rephrase this. I mean if I ask a Microsoft engineer:

"Can I punch you in the face" -> the answer would be: Yes (thinking but I hope you wouldn't) :)

   upvoted 4 times

  **Henry096** 3 years, 2 months ago

Yes, you can, but you shouldn't. :)

  **Plextor** 3 years, 4 months ago

Previews are made available to you on the condition that you agree to these terms of use, which supplement your agreement governing the use of Azure.

So If you want to test preview features go for [preview.portal.azure.com](https://portal.azure.com) if production should you use [portal.azure.com](https://portal.azure.com)

Ans for the first one should be yes

For 12 months after you upgrade your account, certain amounts of a number of products are free.\* After 12 months, you'll be charged at the standard pay-as-you-go rates.

  **Ahmadrad** 3 years, 7 months ago

The platform is delivered over internet and developers can avoid operating systems, software updates, storage and infrastructure. PaaS is especially suited for businesses that want custom applications but also want to reduce costs and time spent through assistance with rapid development and deployment.

  **caklov** 3 years, 7 months ago

Basically they let you not to follow the best practices, open up the security holes and be non-compliant in production environment. What's the point of all the compliances, security and other BSs?

   upvoted 2 times

  **Ankit776** 3 years, 9 months ago

Public preview – During this phase we allow any customer with the proper Azure AD license to evaluate the new feature. Microsoft Customer Support Services will supply support services during this phase, but normal service level agreements do not apply. For new features exposed in the Azure AD Portal, customer can expect to see information banners in the user interface that draw attention to the new experience available during the preview. By clicking on the information banner customers then opt-in to the preview experience.

   upvoted 1 times

  **AbhiYad** 3 years, 9 months ago

Public preview - its just for feedback and use by all people. SLA applicable only for GA editions.

   upvoted 1 times

  **Santhip** 3 years, 9 months ago

Azure preview portal is different to azure portal. First answer is "yes"

   upvoted 1 times

  **Massy** 3 years, 8 months ago

but the services in preview are also in the "normal" portal... the preview portal is only for the preview of the portal, so the first answer is no.

   upvoted 2 times

 **NS\_19** 3 years ago

Previews of new Azure services should show up in both portal.azure.com and preview.portal.azure.com.
