EXAM AZ-900 TOPIC 1 QUESTION 6 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 6

Topic #: 1

[\[All AZ-900 Questions\]](#)

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

You are tasked with deploying Azure virtual machines for your company.

You need to make use of the appropriate cloud deployment solution.

Solution: You should make use of Infrastructure as a Service (IaaS).

Does the solution meet the goal?

A. Yes

B. No

Selected Answer: A

Virtual Machine is an IaaS. so A

   upvoted 10 times

  **AntonioTech** Most Recent  1 month ago

The answer is A. Yes

Using Infrastructure as a Service (IaaS) is the appropriate solution for deploying Azure virtual machines. IaaS provides you with the flexibility to create, manage, and configure virtual machines in the cloud while still maintaining control over the underlying infrastructure, including operating systems, networking, and storage. This option aligns with the goal of deploying Azure virtual machines for your company.
