The Microsoft Privacy Statement is a document that outlines how Microsoft collects, uses, and protects personal data. It is available on the Microsoft website and can be accessed by anyone. The Privacy Statement applies to all Microsoft products and services, including Azure. It provides detailed information about the types of personal data that Microsoft collects, how the data is used, and the steps Microsoft takes to protect the data. It also includes information about data processing agreements and other legal requirements that Microsoft must comply with.

The Online Services Data Protection Addendum ("DPA") sets forth your and Microsoft's obligations with respect to the processing and security of Customer Data and Personal Data in connection with Azure.

The Online Services Privacy and Security Terms section of the Product Terms site further sets forth exclusions from the DPA as well as additional commitments for Core Online Services.

The Microsoft Trust Center provides more information on security, privacy, and compliance topics for customers of Azure and other Microsoft Online Services.

The Service Trust Portal (STP) is a companion feature to the Trust Center that provides access to audit reports, GDPR documentation, compliance guides, and related documents that provide more detailed information on how Microsoft helps protect your data.

The terms formerly contained in the "Online Services Terms" have been moved into the "Product Terms" and no longer exist as standalone terms.
