This question is similar to 79. You must have internet connectivity to use cloud computing -> No". Reason for number 2 being NO is: Azure ExpressRoute is a direct connection from on prem network to cloud.. no traffic passes over the internet.

I agree, ExpressRoute connection is via private Microsoft's network.

Stop giving wrong answers! You are changing the question, this question is not about "using cloud computing". It's about "managing cloud computing". For managing cloud computing in Azure, you must have internet connection to log in Azure Portal!

Yes : You must have internet connectivity to manage cloud services.

No : You do not necessarily need to install a management app to manage cloud services. Many cloud services can be managed through a web interface.

Yes : You can manage cloud services from any modern web browser.

Is it worth it? Are there less outdated questions?

   upvoted 1 times

  **Renuxx** 10 months, 1 week ago

No, it's not. I paid and you get many duplicates and wrong answers

   upvoted 1 times

  **anjanc** 1 year, 7 months ago

correct

correct

Express Route bypasses internet completely. In essence, azure.portal.com must be accessible via Express Route as well. I would go for NNY

   upvoted 3 times

  **XtraWest** 1 year, 8 months ago

YNY, for sure

  **Ni_yot** 1 year, 8 months ago

Extend your on-premises networks to the Microsoft cloud over a private connection with the help of a connectivity provider. ExpressRoute connections don't route through the public internet, providing users with more reliability, faster speeds, consistent latency, and higher security
