Paying for tests which show an answer so obviously wrong

Requiring a paid service to pass exams is obviously wrong.

🗳️ 👤 **NoursBear** 1 month ago

This question is a bit of a fail, they don't host their „own“ infrastructure in the cloud

a) in a private cloud

An organization that hosts its own infrastructure is using a private cloud model. In a private cloud, the services and infrastructure are maintained on a private network and the hardware and software are dedicated solely to the organization.

And no longer requires a data center ?

👍 🔄 🚩 upvoted 1 times

🗳️ 👤 **SRIRAMTRAININGSG** 6 months, 2 weeks ago

Does that mean Private Cloud doesn't need a data center to run? I think the answer is Public cloud. Even the hybrid cloud needs a Datacenter.

Guys, initially I thought it must be public cloud too but only private cloud has its own infrastructure. Basically, a private cloud uses the organisation's dedicated infrastructure and some examples of private clouds are, Amazon VPC, IBM and VMware.

Virtual machine in the public cloud is also an infrastructure.

From ChatGPT: When the exam mentions "private cloud," it typically refers to cloud computing resources and services that are dedicated to a single organization but may not necessarily be hosted on-premises.

Therefore, the answer could be "Private Cloud" if the hosted data center is third-party. Very tricky...

public cloud might be the answer but why does the question say "it's own infrastructure". You don't own the infra in public cloud
