key word "only" according to this link <https://learn.microsoft.com/en-us/azure/storage/common/storage-account-overview>
ZRS is supported is some region not at all, then LRS would be the answer

-   **Erasable_Mak** 2 months, 1 week ago
Premium Block Blobs Storage accounts, the supported redundancy options are:
Geo-redundant storage (GRS)
Geo-zone-redundant storage (GZRS)
Zone-redundant storage (ZRS)
Locally-redundant storage (LRS) is not supported for Premium Block Blob Storage accounts.

ZRS is supported for premium block blobs accounts.
Look under Premium blobn accounts on the microsoft page:
<https://learn.microsoft.com/en-us/azure/storage/common/storage-redundancy>

Azure Premium Disk Storage currently supports only locally redundant storage (LRS). Block blob storage accounts support locally redundant storage (LRS) and zone redundant storage (ZRS) in certain regions

As an example if you select the region "Canada Central", LRS is the only redundancy option available for all the premium options page blobs, block blobs and file shares.

"Block blob storage accounts support locally redundant storage (LRS)". And "zone redundant storage (ZRS) in certain regions." So the correct answer should be LRS for all regions by default.

   upvoted 4 times

  **hundredsandthousands** 1 year, 9 months ago

Key word - 'redundancy', means it will have to be stored in more than one place. So answer is correct, ZRS.

  **hundredsandthousands** 1 year, 9 months ago

Hmm, thinking on it LRS states redundancy as well - yes I have to say it is confusing if it supports both LRS and ZRS!? Which is the correct answer then?

   upvoted 3 times

  **RougePotatoe** 1 year, 9 months ago

No clear answer thank Microsoft

   upvoted 4 times

  **hundredsandthousands** 1 year, 9 months ago

I guess go with the better of the two as they are paying for Premium block blobs, I guess ZRS is better!?
