### EXAM AZ-900 TOPIC 1 QUESTION 234 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 234

Topic #: 1

[\[All AZ-900 Questions\]](#)

DRAG DROP -

Match the Azure services benefits to the correct descriptions.

Instructions: To answer, drag the appropriate benefit from the column on the left to its description on the right. Each benefit may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Select and Place:

#### Services

#### Answer Area

Azure Active Directory  
(Azure AD)

Azure Key Vault

Azure Lighthouse

Microsoft Defender for  
Cloud

Microsoft Sentinel

Provide security information event  
management (SIEM) functionality

Display the secure score for an Azure  
subscription

Store passwords for use by Azure  
Function applications

<https://learn.microsoft.com/en-us/azure/sentinel/overview>

Microsoft Sentinel is a scalable, cloud-native solution that provides:

- Security information and event management (SIEM)
- Security orchestration, automation, and response (SOAR)

Microsoft Sentinel delivers intelligent security analytics and threat intelligence across the enterprise. With Microsoft Sentinel, you get a single solution for attack detection, threat visibility, proactive hunting, and threat response.

Microsoft Sentinel is your bird's-eye view across the enterprise alleviating the stress of increasingly sophisticated attacks, increasing volumes of alerts, and long resolution time frames.

<https://learn.microsoft.com/en-us/azure/defender-for-cloud/secure-score-security-controls>

Microsoft Defender for Cloud has two main goals:

- to help you understand your current security situation
- to help you efficiently and effectively improve your security

The central feature in Defender for Cloud that enables you to achieve those goals is the secure score.

Defender for Cloud continually assesses your cross-cloud resources for security issues. It then aggregates all the findings into a single score so that you can tell, at a glance, your current security situation: the higher the score, the lower the identified risk level.

<https://learn.microsoft.com/en-us/azure/key-vault/general/basic-concepts>

Azure Key Vault is a cloud service for securely storing and accessing secrets. A secret is anything that you want to tightly control access to, such as API keys, passwords, certificates, or cryptographic keys. Key Vault service supports two types of containers: vaults and managed hardware security module(HSM) pools. Vaults support storing software and HSM-backed keys, secrets, and certificates. Managed HSM pools only support HSM-backed keys.

Correct

   upvoted 1 times

  **daloslav** 9 months ago

Same as #224 but with new naming Microsoft Defender for Cloud (legacy Azure Security Center)

   upvoted 1 times

  **kamal\_004** 2 years ago

Answer:

Provide security Information event management (SIEM) functionality – Microsoft Sentinel

Display the secure score for an Azure subscription – Microsoft Defender for Cloud

Store passwords for use by Azure Function applications – Azure Key vault
