EXAM AZ-900 TOPIC 1 QUESTION 191 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 191

Topic #: 1

[\[All AZ-900 Questions\]](#)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

An Azure administrator plans to run a PowerShell script that creates Azure resources.

You need to recommend which computer configuration to use to run the script.

Solution: Run the script from a computer that runs Windows 10 and has the Azure PowerShell module installed.

Does this meet the goal?

A. Yes

B. No

Isn't Azure CLI required ?

👍 ↩️ 🚩 upvoted 23 times

🗋️ 👤 **Cornelius1234** 3 years, 5 months ago

No. Azure Powershell and Azure CLI are 2 different things. Their functionality is very similar, however one uses Powershell syntax, while Azure CLI uses bash syntax.

🗋️ 👤 **Splay** 3 years, 3 months ago

Yep, but to interact with Azure, the CLI must be installed. PowerShell on it's own doesn't suffice.

🗋️ 👤 **Stanzin** 3 years, 3 months ago

If the Azure PowerShell module is installed then there's no need to have the CLI installed as well.

You are correct, for example here <https://docs.microsoft.com/en-us/powershell/azure/install-az-ps?view=azps-6.3.0> you can see how to connect without Azure CLI

No, if you have azure powershell installed there's no need. "Azure PowerShell is a set of cmdlets for managing Azure resources directly from PowerShell. Azure PowerShell is designed to make it easy to learn and get started with, but provides powerful features for automation." Basically you have two options, azure CLI or Azure powershell. You have to install one of them to access azure resources from command-line

The Az PowerShell module is a set of cmdlets for managing Azure resources directly from PowerShell. PowerShell provides powerful features for automation that can be leveraged for managing your Azure resources, for example in the context of a CI/CD pipeline. (<https://docs.microsoft.com/en-us/powershell/azure/new-azureps-module-az?view=azps-6.5.0>)
Correct Answer: Yes

👍 ↩️ 🚩 upvoted 6 times

🗋️ 👤 **sam2k** Highly Voted 3 years, 2 months ago

Answer A. YES is correct.

Windows 10 already comes with powershell installed. Only powershell AZ modules need to be installed on top of that, which the author/question is doing.

Isn't Azure CLI required ?

👍 ↩️ 🚩 upvoted 2 times

🗋️ 👤 **zelovoc** 2 years, 6 months ago

I have an question, in one of previous questions there was mentioned that Azure CLI is needed, with Azure CLI local powershell can be used so azure powershell is not needed and syntax is not an issue here (so far about discussions that Azure CLI uses bash syntax - I trust this is odd topic). So from my perspective - will be both solutions equal? (1) azure CLI plus powershell or 2) Azure powershell)? Do we know?

  **RougePotatoe** 1 year, 9 months ago

Azure CLI is for if you want to use Bash syntax. Azure Powershell extension is for if you want to use Powershell syntax.

You can use Bash syntax in powershell but you need to install Azure CLI.

You must install Azure Powershell extension to use Local Powershell.

  **RISHI_009** 3 years, 3 months ago

Just isntall Azure PowerShell module and use its syntax to create any resource

   upvoted 1 times

  **valente_sven1** 3 years, 3 months ago

Main in this question is "Run PowerShell Script". You can't use Azure CLI since syntax is different from Azure PowerShell.

  **BalaBalaji** 3 years, 3 months ago

yes Azure CLI is required. But im not sure

   upvoted 2 times

  **wmlead** 3 years, 3 months ago

answer is yes

   upvoted 1 times

  **GullyRanger** 3 years, 4 months ago

The most vaguely worded question I have ever read

   upvoted 2 times

  **semauni** 1 year, 5 months ago

You haven't read a lot of questions for this exam yet then xD

   upvoted 2 times

  **Maharba** 3 years, 5 months ago

Well, it was stated that some of these questions can have multiple answers. So I think both this option and using the Azure CLI are correct
