EXAM AZ-900 TOPIC 1 QUESTION 394 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 394

Topic #: 1

[\[All AZ-900 Questions\]](#)

HOTSPOT

-

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
The Archive access tier for Azure Storage can be set at the account level.	<input type="radio"/>	<input type="radio"/>
The Cool access tier offers the lowest costs for storing blobs in Azure Storage.	<input type="radio"/>	<input type="radio"/>
After blobs are uploaded to an Azure Storage container, the access tier of the storage account can be changed.	<input type="radio"/>	<input type="radio"/>

Should be N N Y:  
"Storage accounts have a default access tier setting that indicates the online tier in which a new blob is created. The default access tier setting can be set to either \_hot or cool\_."

yes, archive tier can be set on blob level, same to question 134  
   upvoted 5 times
-   **RougePotatoe** 1 year, 9 months ago  
This is talking about account level. Go into azure and test it you self you cannot do this at Storage account level  
   upvoted 1 times
-   **Nghia1** 1 year, 5 months ago  
agree. The account access tier is the default tier that is inferred by any blob without an explicitly set tier. The hot access tier is ideal for frequently accessed data, and the cool access tier is ideal for infrequently accessed data. The archive access tier can only be set at the blob level and not on the account.

You're paying for questions, not answers. It doesn't make it any less worse, but this is basically the easiest way to prepare for the exams alone. It's still up to you to study and know personally the material.

Hot Tier:  
  
Storage Cost: Highest  
Access Cost: Lowest  
Cool Tier:  
  
Storage Cost: Medium  
Access Cost: Medium  
Archive Tier:  
  
Storage Cost: Lowest  
Access Cost: Highest

3rd: YES. To explicitly set a blob's tier when you create it, specify the tier when you upload the blob. After a blob is created, you can change its tier in either of the following ways: By calling the Set Blob Tier operation, either directly or via a lifecycle management policy.

1st: NO. Hot, cool, and cold access tiers can be set at the account level. The archive access tier isn't available at the account level.

the archive access tier for Azure storage can be set at the account level. This means you can configure the archive access tier for all blobs stored in an Azure storage account, which will affect all containers and blobs within that account.

  **funkybik** 1 year, 4 months ago

There is no point to pay for such questions and in return you will get wrong answers. I am just thinking without contributors what will we do.
