### EXAM AZ-900 TOPIC 1 QUESTION 415 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 415

Topic #: 1

[\[All AZ-900 Questions\]](#)

#### HOTSPOT

-

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

#### Answer Area

Statements	Yes	No
An Azure Virtual Desktop session host can run Windows 10 or Windows 11 only.	<input type="radio"/>	<input type="radio"/>
An Azure Virtual Desktop host pool that includes 20 session hosts supports maximum of 20 simultaneous user connections.	<input type="radio"/>	<input type="radio"/>
Azure Virtual Desktop supports desktop and app virtualization.	<input type="radio"/>	<input type="radio"/>

I believe NNY is correct.

"We support the following 64-bit versions of these operating systems . . .

Windows 11 Enterprise multi-session

Windows 11 Enterprise

Windows 10 Enterprise multi-session

Windows 10 Enterprise

Windows Server 2022

Windows Server 2019

Windows Server 2016

Windows Server 2012 R2"

Prerequisites for Azure Virtual Desktop

Copilot: The number of simultaneous user connections in an Azure Virtual Desktop host pool depends on the configuration and the load balancing algorithm used.

Load Balancing Algorithms:

Breadth-first: Distributes user sessions evenly across all session hosts. This means each session host will have a roughly equal number of user sessions<sup>1</sup>.

Depth-first: Fills up one session host to its maximum capacity before moving on to the next<sup>1</sup>.

Session Limits:

The maximum number of sessions per host can be configured based on the VM size and the expected workload<sup>2</sup>. For example, a host might support 5 to 10 users depending on the resources allocated to it<sup>2</sup>.

In theory, you can set a very high maximum session limit, but practical limits depend on the performance and resource requirements of the applications being used<sup>3</sup>.

So, a host pool with 20 session hosts can support more than 20 simultaneous user connections, depending on how you configure the session limits and the load balancing strategy.

Answer is NNY. AVD support windows server operating system as well.

   upvoted 2 times

  **ManuelG00** 1 year ago

The answer to question Q1 is NO. Azure Virtual Desktop also supports Windows Server 2022, Windows Server 2019, Windows Server 2016. However, Windows 10 and Windows 11 are the only operating systems that support multi-session mode, which is the most commonly used mode for Azure Virtual Desktop. Therefore, the most accurate answer is no.

No, No, Yes. For the first question the keyword is "only". Windows 10 and 11 are supported for Microsoft Virtual Desktop but also various Windows servers are supported as well. Link below:

  **iHanzz** 1 year, 5 months ago

Nope NNY is correct, there are more OS options for VM, but this is about Virtual Desktop which is Win 10 or 11 on a VM

   upvoted 4 times

  **Toast1536** 1 year, 5 months ago

Which is why it's YNY. the question asks if Virtual Desktop supports Win 10 or Win 11.

<https://learn.microsoft.com/en-us/azure/virtual-desktop/overview>

Set up a multi-session Windows 11 or Windows 10 deployment that delivers a full Windows experience with scalability

Present Microsoft 365 Apps for enterprise and optimize it to run in multi-user virtual scenarios

Bring your existing Remote Desktop Services (RDS) and Windows Server desktops and apps to any computer

Virtualize both desktops and apps

Manage desktops and apps from different Windows and Windows Server operating systems with a unified management experience
