EXAM AZ-900 TOPIC 1 QUESTION 266 DISCUSSION

Actual exam question from APICS's CSCP

Question #: 266

Topic #: 1

[\[All CSCP Questions\]](#)

What should you use to evaluate whether your company's Azure environment meets regulatory requirements?

- A. Azure Service Health
- B. Azure Knowledge Center
- C. Azure Security Center **Most Voted**
- D. Azure Advisor

Hide Answer

Suggested Answer: C

The advanced monitoring capabilities in Security Center lets you track and manage compliance and governance over time. The overall compliance provides you with a measure of how much your subscriptions are compliant with policies associated with your workload.

Selected Answer: C

C is the answer.

Azure Security Center has been renamed to Microsoft Defender for Cloud.

<https://learn.microsoft.com/en-us/azure/defender-for-cloud/defender-for-cloud-introduction#cspm---remediate-security-issues-and-watch-your-security-posture-improve>

As soon as you open Defender for Cloud for the first time, Defender for Cloud:

- Generates a secure score for your subscriptions based on an assessment of your connected resources compared with the guidance in Microsoft cloud security benchmark. Use the score to understand your security posture, and the compliance dashboard to review your compliance with the built-in benchmark. When you've enabled the enhanced security features, you can customize the standards used to assess your compliance, and add other regulations (such as NIST and Azure CIS) or organization-specific security requirements. You can also apply recommendations, and score based on the AWS Foundational Security Best practices standards.
