Selected Answer: A

A is the answer.

A is the answer.

<https://learn.microsoft.com/en-us/azure/sentinel/overview>

Microsoft Sentinel delivers intelligent security analytics and threat intelligence across the enterprise. With Microsoft Sentinel, you get a single solution for attack detection, threat visibility, proactive hunting, and threat response.

<https://learn.microsoft.com/en-us/azure/sentinel/overview#collect-data-by-using-data-connectors>

Microsoft Sentinel comes with many connectors for Microsoft solutions that are available out of the box and provide real-time integration. Some of these connectors include:

- Azure service sources like Azure Active Directory, Azure Activity, Azure Storage, Azure Key Vault, Azure Kubernetes service, and more.

Microsoft Sentinel is a security information and event management (SIEM) and security orchestration, automated response (SOAR) solution. It can be used to collect and analyze security events from Azure Active Directory (Azure AD) and other data sources. Microsoft Sentinel is a cloud-native platform that integrates with Azure AD, Azure ATP and other security solutions in Azure to provide a unified view of security events, it also support automatic response to threats. It also allows you to create custom workflows, rules, and queries to detect and respond to threats.
