Correct.

Microsoft Azure Sentinel is a scalable, cloud-native, security information event management (SIEM) and security

Microsoft Azure Sentinel is a scalable, cloud-native, security information event management (SIEM) and security orchestration automated response (SOAR) solution. Azure Sentinel delivers intelligent security analytics and threat intelligence across the enterprise, providing a single solution for alert detection, threat visibility, proactive hunting, and threat response.

Azure Sentinel comes with a number of connectors for Microsoft solutions, available out of the box and providing real-time integration, including Microsoft 365 Defender (formerly Microsoft Threat Protection) solutions, and Microsoft 365 sources, including Office 365, Azure AD, Microsoft Defender for Identity (formerly Azure ATP), and Microsoft Cloud App Security, and more.

Also true, Azure Sentinel is never mentioned in any of the Microsoft exam preparation manual, so unless you studied other exams, happen to know it or visit sites like these you don't get the knowledge you need to go on exam.

Selected Answer: A

A is the answer.

<https://learn.microsoft.com/en-us/azure/sentinel/overview>

Microsoft Sentinel delivers intelligent security analytics and threat intelligence across the enterprise. With Microsoft Sentinel, you get a single solution for attack detection, threat visibility, proactive hunting, and threat response.

<https://learn.microsoft.com/en-us/azure/sentinel/overview#collect-data-by-using-data-connectors>

Microsoft Sentinel comes with many connectors for Microsoft solutions that are available out of the box and provide real-time integration. Some of these connectors include:

- Azure service sources like Azure Active Directory, Azure Activity, Azure Storage, Azure Key Vault, Azure Kubernetes service, and more.

Azure Sentinel is a cloud-native security information and event management (SIEM) and security orchestration automated response (SOAR) solution. It can be used to collect and analyze security events from various sources, including Azure Active Directory (Azure AD). With Azure Sentinel, you can use predefined queries, built-in connectors, and the use of playbooks to investigate and respond to security incidents.
