### EXAM AZ-900 TOPIC 1 QUESTION 412 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 412

Topic #: 1

[\[All AZ-900 Questions\]](#)

Your company has an Azure subscription that contains several resources.

You need to identify which department is responsible for the cost of each resource.

What should you use?

- A. budgets
- B. alerts
- C. tags

**Selected Answer: C**

I don't see how budgets can help with identifying, I'd go with tags.

same here, couldn't figure out how budgets where you can control costs in azure can identify resources - if you add them it could be, but tags are perfect for identifying resources.

**Selected Answer: C**

C. tags

To identify which department is responsible for the cost of each resource in an Azure subscription, you can use tags. Tags are name-value pairs that enable you to categorize resources in a way that is meaningful to your organization. You can use tags to identify resources that belong to a specific department or project, for example.

Once you have tagged your resources with the appropriate department or project information, you can use the Azure Cost Management + Billing service to generate reports and analyze costs by department or project. This can help you identify areas where you may be able to reduce costs or optimize your resource usage.

Budgets and alerts can also be useful tools for monitoring and managing costs in an Azure subscription, but they are not specifically designed for identifying which department is responsible for the cost of each resource.

specifically designed for identifying which department is responsible for the cost of each resource.
