Has anyone actually seen this question on the test? The question asks which node (singular) is to be selected. I don't understand why "Overview" is being highlighted. I would say that "IAM" is the only node that should be selected.

So many of the answers to these questions confuse me. Rather than testing your working knowledge of Azure, they test your ability to deconstruct the questions and rationalize the answers.

Let me give you the typical boomer response. In order for you to support your customer sometimes you have to figure out what they really want to do.

I go to "resource gr", I select one of my created resource gr and select overview menu. I didn't find any info about roles assigned or a link to configure RBAM. So only IAM is the corect answer

Access control (IAM) is the page that you typically use to assign roles to grant access to Azure resources.
