EXAM AZ-900 TOPIC 1 QUESTION 171 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 171

Topic #: 1

[\[All AZ-900 Questions\]](#)

**HOTSPOT -**

You need to identify which blades in the Azure portal must be used to perform the following tasks:

- ⇒ View security recommendations.
- ⇒ Monitor the health of Azure services.
- ⇒ Browse available virtual machine images.

Which blade should you identify for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

Monitor the health of Azure services:

	▼
Monitor	
Subscriptions	
Marketplace	
Advisor	

Browse available virtual machine images:

	▼
Monitor	
Subscriptions	
Marketplace	
Advisor	

ADVISOR

View security recommendations:

	▼
Monitor	
Subscriptions	
Marketplace	
Advisor

"Advisor provides recommendations for Application Gateway, App Services, availability sets, Azure Cache, Azure Data Factory, Azure Database for MySQL, Azure Database for PostgreSQL, Azure Database for MariaDB, Azure ExpressRoute, Azure Cosmos DB, Azure public IP addresses, SQL Data Warehouse, SQL servers, storage accounts, Traffic Manager profiles, and virtual machines."

Note: It does not support AD like it was asked in the other question.

I think you are referring to a question where an incorrect response was Azure AD; Azure Advisor doesn't do security recommendations for AAD security and the question was about security recommendations

The given answer is correct. for the second point: Read the full line, "available " and images" mean you are looking for something ready and one by others, from a sort of catalog; this is the marketplace.
