Note: If you want to raise the limit or quota above the default limit, open an online customer support request at no charge.

ChatGPT Monitor Azure Service Health:

Azure Service Health provides personalized alerts and guidance when Azure service issues affect you. You can set up alerts to notify you about subscription limits.

So Microsoft learning paths, modules, practice exams, ... the whole certification itself on their platform is set up to milk your \$100. This is how they make money huh. New support request was no where mentioned in the entire course.

Is it available for all subscription plans, even with Basic support? or you have to upgrade your support plan because the basic support doesn't have ticket support?
