HOTSPOT -

To complete the sentence, select the appropriate option in the answer area.

Hot Area:

Answer Area

When planning to migrate a public website to Azure,
you must plan to

- deploy a VPN.
- pay monthly usage costs.
- pay to transfer all the website data to Azure.
- reduce the number of connections to the website.

Answer: Pay monthly usage costs.

Explanation:

When migrating a public website to Azure, you need to plan for the pricing model that Azure provides. Azure charges for the usage of resources such as virtual machines, storage, and data transfer. Therefore, you need to plan to pay monthly usage costs for hosting the website on Azure. Deploying a VPN, paying to transfer all the website data to Azure, or reducing the number of connections to the website are not necessarily required for migrating a public website to Azure.

  **Pieter1337** 1 year, 11 months ago

When I am planning I am not paying anything yet... poor wording...

   upvoted 4 times

  **Rudyodeesh** 1 year, 10 months ago

Actually, is not a poor wording at all ..it clearly says "you must plant to..pay. so the answer is not you PAY but you must PLAN to pay.

  **Chikito_21** 2 years, 11 months ago

Ddos protects at both the network and application layer(DDoS Protection Standard protects both at the network layer (Layer 3 and 4, offered by Azure DDoS Protection Standard) and at the application layer (Layer 7, offered by a WAF))
