📄 EXAM AZ-900 TOPIC 1 QUESTION 172 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 172

Topic #: 1

[\[All AZ-900 Questions\]](#)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure environment. You need to create a new Azure virtual machine from a tablet that runs the Android operating system.

Solution: You use Bash in Azure Cloud Shell.

Does this meet the goal?

A. Yes

B. No

🗄️ **ttn** Highly Voted 3 years, 7 months ago

Agree, panal. However it had been more clear if it was mentioned that a browser on the Android tablet can be used to connect to Azure portal where Azure cloud shell can be accessed.

Selected Answer: A

You can use any browser to launch Cloud Shell and from there choose Bash or Power shell.

Selected Answer: A

Yes, it is possible to use Bash in Azure Cloud Shell to create a new Azure virtual machine from a tablet that runs the Android operating system.

Azure Cloud Shell is a browser-based command-line interface that allows you to manage your Azure resources from anywhere with an Internet connection. It provides a choice of shells, including Bash and PowerShell, that you can use to run scripts and commands to manage your Azure resources.
