Had that question on (26.02.23). The following questions were included and even a mixture of them. I may repeat a question, but they are repeated here as well. Good luck all.

28,44,46,55,72,80,91,94,95,97,100,107,111,128,134,138,149,151,159,227,258,269,277,278,296,307,331,337,330/350,353,354,394,398,401,405,407

  **tej00000001** 1 year, 6 months ago

this alexxkkk guy has been saying that for the past 276 question.

its better if you get access it only 40 dollars and the payout once you have this cert in your pocket is much greater. dont cheap out on your prosperity

  **zelck** 1 year, 9 months ago

Selected Answer: D

D is the answer.

<https://learn.microsoft.com/en-us/azure/governance/policy/overview#policy-definition>

The journey of creating and implementing a policy in Azure Policy begins with creating a policy definition. Every policy definition has conditions under which it's enforced. And, it has a defined effect that takes place if the conditions are met.

In Azure Policy, we offer several built-in policies that are available by default. For example:

- Not allowed resource types (Deny): Prevents a list of resource types from being deployed.

We can use a lock or policy if it other statement is not present in question that 'other object can be created'.

So correct answer is D.

  **silviogremio** 2 years, 4 months ago

Selected Answer: D

Core Point is, Azure Policy enforces compliance to new and already existing resources.
