OpEx refers to the day-to-day operational expenses that support the business. These typically include general and administrative expenses, employee wages, research and development, cost of goods sold (COGS), maintenance, repair costs, leases, etc.

Key Takeaways. It is important for these questions to know the main difference between CapEx and OpEx

Capital expenditures are a company's major, long-term expenses while operating expenses are a company's day-to-day expenses.

Examples of CapEx include physical assets, such as buildings, equipment, machinery, and vehicles. (physical and hardware related)

Examples of OpEx include employee salaries, rent, utilities, and property taxes. This relates to people and other expenses. For example. I own a fleet of taxis.

- I buy the cars (CapEx). That is my investment
- Then I pay taxi drivers wages to drive the taxis (Opex), as well as fuel , registration, insurances, licenses, etc.
- The taxi will last for many years , but not so the fuel, licenses and registration, etc

The Taxi Driver operates the taxi (asset)

Leasing Software - CapEx (not OpEx)

   upvoted 3 times

  **RougePotatoe** 1 year, 9 months ago

You typically own the items you categorize as CapEx. A lease on a software is not a CapEx it is OpEx.

Leasing doesn't mean possession, you may give the item/rights (software in this case) back and stop the payment which is a flexible method, so leasing is OpEx.
