"Microsoft Defender for Cloud" is the answer.

<https://learn.microsoft.com/en-us/azure/defender-for-cloud/just-in-time-access-usage>

You can use Microsoft Defender for Cloud's just-in-time (JIT) access to protect your Azure virtual machines (VMs) from unauthorized network access. Many times firewalls contain allow rules that leave your VMs vulnerable to attack. JIT lets you allow access to your VMs only when the access is needed, on the ports needed, and for the period of time needed.
