The question betrays the answers. We have an AZURE WEB APP (on the cloud) that queries a local ON-PREMISES MS SQL Server (on-premise)

This is a clear case scenario of an hybrid cloud setup

Is Hybrid, "An Azure Web App (Public) x "An MS SQL Server (Private)"

👍 🔄 🚩 upvoted 4 times

🗄️ 👤 **phuctran** 2 years, 1 month ago

Why not Private?

👍 🔄 🚩 upvoted 2 times

🗄️ 👤 **NCLatWorld** 1 year, 9 months ago

Azure web app should be public cloud, and on-premises should be private cloud. Therefore, the answer is hybrid cloud.

Cool explanation..

👍 🔄 🚩 upvoted 1 times

🗄️ 👤 **Conviction454** 2 years ago

I originally thought private as well, but I'm guessing because Azure Web would generally be categorized as a Public Cloud Service, and On-prem is private... therefore hybrid. Sorry I don't have a better explanation.
