EXAM AZ-900 TOPIC 1 QUESTION 150 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 150

Topic #: 1

[\[All AZ-900 Questions\]](#)

DRAG DROP -

Match the cloud service models to the appropriate solutions.

To answer, drag the appropriate cloud service model from the column on the left to its solution on the right. Each cloud service model may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Select and Place:

	Answer Area
Infrastructure-as-a-Service (IaaS)	<input type="text"/> A cloud-based file server
Platform-as-a-Service (PaaS)	<input type="text"/> A cloud-based accounting system
Software-as-a-Service (SaaS)	<input type="text"/> A cloud-based service for custom apps

1)PaaS 2) SaaS 3) IaaS

   upvoted 26 times

  **KeanoD** 2 years ago

3) should be PaaS

Not sure about 1).

   upvoted 3 times

  **jrop** 2 years ago

1) Is IaaS, because you can use a vm for a file system or use Azure Files for a File System, so VM and Azure File are IaaS.

The question uses the word server. That means it is IAAS.

   upvoted 8 times

  **javito82** 1 year, 4 months ago

Is wrong! I think is IIP: 1) IaaS 2) IaaS 3) PaaS - File Server and Account System is IaaS, and 3 I'm sure that is PaaS

   upvoted 5 times

  **javito82** 1 year, 4 months ago

Sorry, I think that is III:

for custom apps like accounting system is IaaS, and file server needs a virtual machine, will be IaaS too.

   upvoted 1 times

  **Kanatius** 1 year, 4 months ago

The given answer is correct! File share is IaaS: look at <https://learn.microsoft.com/en-gb/training/azure-fundamentals/intro-to-azure-fundamentals/media/azure-services-6c41a736.png>

The second one is SaaS because it is a ACCOUNTING (finance) system, not an ACCOUNT (users) system

The third is PaaS : A cloud based solution for you deploy your custom app solution (Web Apps)

Correct

   upvoted 15 times

  **vanith** Most Recent  1 year, 4 months ago

It's correct because,

1. IaaS - the cloud-based file server would provide the infrastructure components necessary for file storage and retrieval, such as servers, storage devices, and networking resources. Users would typically have more control and flexibility over the operating system, file system, and software installed on the server.

2. SaaS - the accounting software is provided as a fully managed service over the internet. Users can access the software through a web browser or a client application without the need for local installation or maintenance.

3. PaaS - the cloud provider offers a platform that allows developers to build, deploy, and manage custom applications without having to worry about the underlying infrastructure. This platform typically includes development tools, programming languages, libraries, and frameworks to facilitate the app development process.

I think it's:

1) PaaS

2) SaaS

3) PaaS

Don't forget you're allowed to use answers multiple times!

  **semauni** 1 year, 5 months ago

I am, however, doubting myself here for #1 since Azure Storage is generally considered IaaS.

Is anyone able to verify that SaaS is the correct answer for the second box? The question does not ask if Dynamics 365 is SaaS, IaaS, or PaaS, it just asks which a "cloud-based accounting system" would be. To my way of thinking, any such cloud based system--other than Microsoft specific services--would be PaaS. Therefore the answer for the second box is either wrong, or the question is deliberately too vague.

   upvoted 2 times

  **Faren** 2 years, 1 month ago

Yeah , SaaS, is deemed correct for the 2nd box, if you think about it, the accounting system is similar to a pre-built like 365. Again once of those where they wanna trick us.

All of the best K2001!

Why would anyone try to trick you, these is a discussion platform, and people are sharing their idea...so be positive.
