You can only have one account administrator per subscription:

<https://docs.microsoft.com/en-us/azure/role-based-access-control/rbac-and-directory-admin-roles>

   upvoted 115 times

  **Rooks** 4 years, 6 months ago

This is correct as the article says and I confirmed in my subscription..

Classic subscription administrator Limit -

Account Administrator 1 per Azure account

   upvoted 21 times

  **GreenyErin** 3 years, 7 months ago

Exactly, Account Administrator: 1 per Azure account => an account may have a number of subscriptions but still have 1 Account administrator

  **Aniquil** 3 years, 4 months ago

yes....1st one should be NO

   upvoted 5 times

  **sbettani** 4 years, 10 months ago

The link says the opposite "In the Azure portal, you can manage Co-Administrators or view the Service Administrator by using the Classic administrators tab." there are three types of administrators.

"The account that is used to sign up for Azure is automatically set as both the Account Administrator and Service Administrator. Then, additional Co-Administrators can be added. "

@sbettani: more than one administrator, but ONLY ONE account administrator!

   upvoted 40 times

  **Danny3010** Highly Voted  4 years, 9 months ago

You can have 1 Account Administrator and 1 Service Administrator, but you can have 200 Co-Administrators per subscription

   upvoted 53 times

  **rlny88** 4 years, 4 months ago

I agree. If they worded differently such as "multiple administrator accounts" vs. "multiple account administrators"..

NNN is just fine;

isnt it; No: Each Azure subscription has one account administrator, but it can have multiple service administrators and co-administrators?

Copilot

Verzonden door Copilot:

You're correct! Let's clarify:

Account Administrator: Each Azure subscription has one Account Administrator who has full access to the subscription and can manage all resources.

Service Administrators and Co-Administrators: An Azure subscription can have multiple Service Administrators and Co-

Service Administrators and Co-Administrators. An Azure subscription can have multiple Service Administrators and Co-Administrators who also have significant management capabilities within the subscription. So, the statement "Each Azure subscription can contain multiple account administrators" should indeed be No. Instead, it can have multiple Service Administrators and Co-Administrators.

Thank you for pointing that out! If you have any more questions or need further clarification, feel free to ask!

1. yes - each Azure subscription can have multiple account administrators.
2. No - we can create using a Microsoft account, but we can use AD.
3. No - think of Azure resource group as a room and Azure subscription as a house. we have many rooms inside a house but we cannot have a house inside the room.

  **Abdis** 2 months, 2 weeks ago

Ans from Copilot - Yes, each Azure subscription can indeed contain multiple account administrators. These administrators have permissions to manage resources within the subscription.

   upvoted 1 times

  **Erasable_Mak** 2 months, 1 week ago

Ans from Copilot - The answer is No for the statement "Each Azure subscription can contain multiple account administrators." There can only be one Account Administrator per Azure subscription, who is responsible for billing and subscription management. However, you can assign multiple users with administrative roles within the subscription to manage resources, but these roles are different from the Account Administrator role. (maybe AI have gone mad)

  **NoursBear** 3 months ago

For the second one, because of the wording, it's easy to think Yes

  **gaurav_currency** 3 months, 2 weeks ago

No, No and No

   upvoted 1 times

  **VaibhavGawali** 4 months, 1 week ago

NNN is correct.

1. No: Each Azure subscription has one account administrator, but it can have multiple service administrators and co-administrators.
2. No: An Azure subscription can be managed using both a Microsoft account and an organizational account (Azure Active Directory account).
3. No: An Azure resource group is a container that holds related resources for an Azure solution. It does not contain multiple Azure subscriptions; rather, it organizes resources within a single subscription.

Do I need a Microsoft account to sign up for Azure?

You can sign up with either a Microsoft account or a GitHub account.

OpenAI reply about multiple account administrators.

Yes, each Azure subscription can have multiple account administrators. Azure provides role-based access control (RBAC) to manage and control access to Azure resources and services. With RBAC, you can assign different roles to users, groups, or applications, granting them specific permissions and levels of access within a subscription.
