 **Acai** 3 years, 3 months ago

right, Azure Advisor gives you recommendations to reduce cost, It will not determine the overall cost.

   upvoted 3 times

 **CosminC** 2 years, 11 months ago

I agree the Azure Advisor gives you only cost savings estimates for your subscription <https://docs.microsoft.com/en-us/azure/advisor/advisor-cost-recommendations> so therefore I assume you can't use Azure Advisor to estimate potential azure solutions.

 **Ranoooosh** Highly Voted  3 years, 5 months ago

Correct answer is C. I've tried it.. I opened portal-> adviser -> security : it shows me this message: "You are following all of our security recommendations for the selected subscriptions and resources." Which is exactly what answer C says!

Azure Advisor primarily helps with optimizing your Azure resources and improving the efficiency of your deployments. Based on the provided options:

B. **Estimate the costs of an Azure solution:** This is a task that Azure Advisor can help with. It provides recommendations on optimizing costs and maximizing the value of your Azure resources.

The other options are typically associated with different Azure services:

A. Integrating Active Directory and Azure Active Directory is typically done through Azure AD services.

C. Confirming Azure subscription security best practices is more aligned with Azure Security Center.

D. Evaluating on-premises resources for migration to Azure is typically done through tools like Azure Migrate.

So, for tasks related to optimizing costs and resource efficiency, Azure Advisor is a good choice.

 **zelck** 1 year, 9 months ago

Selected Answer: C

C is the answer.

<https://learn.microsoft.com/en-us/azure/advisor/advisor-security-recommendations>

Azure Advisor provides you with a consistent, consolidated view of recommendations for all your Azure resources. It integrates with Microsoft Defender for Cloud to bring you security recommendations. You can get security recommendations from the Security tab on the Advisor dashboard.

   upvoted 2 times

 **Soldier** 2 years, 1 month ago

The answer is B. Some of Azure Advisor tasks include the integration of AD and Azure AD, estimate the costs of an Azure solution, confirms that Azure subscription follows best practices, evaluate which on-premises resources can be migrated to Azure

Selected Answer: C

"Advisor is a personalized cloud consultant that helps you follow BEST PRACTICES to optimize your Azure deployments. It analyzes your resource configuration and usage telemetry and then recommends solutions that can help you improve the cost effectiveness, performance, reliability (formerly called high availability), and SECURITY of your Azure resources."

  **jj4321** 2 years, 3 months ago

Both B and C may be right, but as a best answer it's B. The main goal of Cloud is the cost saving

   upvoted 2 times

  **Dennis_SOn** 2 years, 5 months ago

Advisor provides relevant best practices to help you improve reliability, security, and performance, achieve operational excellence, and reduce costs. Configure Advisor to target specific subscriptions and resource groups, to focus on critical optimisations. Access Advisor through the Azure portal, the Azure Command Line Interface (CLI), or the Advisor API. Or configure alerts to notify you automatically about new recommendations.

Selected Answer: C

C is the right one!

   upvoted 2 times

  **TitoChuz** 2 years, 5 months ago

This is C, option B refers to TCO

<https://azure.microsoft.com/en-us/pricing/tco/calculator/>

   upvoted 2 times

  **sssfasih** 2 years, 2 months ago

Option B refers to Azure Pricing Calculator. TCO is for calculating the difference between on-premises costs and Azure costs.

<https://docs.microsoft.com/en-us/azure/advisor/advisor-cost-recommendations>

"Advisor shows the estimated cost savings for either recommended action: resize or shut down" -- WHAT ABOUT THIS?

   upvoted 1 times

  **sk294** 2 years, 7 months ago

Answer is B guys: <https://docs.microsoft.com/en-us/azure/advisor/advisor-cost-recommendations>

Advisor does not CONFIRM any best practices. It just HELPS you with it. <https://docs.microsoft.com/en-us/azure/advisor/advisor-overview>
