Answer is correct (N,N,Y)

1. NO - Supported O/Ses are Windows 10 Enterprise multi-session or Windows 10 Enterprise, Windows 7 Enterprise, Windows Server 2012 R2, 2016, 2019. See <https://docs.microsoft.com/en-us/azure/virtual-desktop/overview#requirements>
2. NO - For Max session limit, enter the maximum number of users you want load-balanced to a single session host. See <https://docs.microsoft.com/en-us/azure/virtual-desktop/create-host-pools-azure-marketplace#begin-the-host-pool-setup-process> and <https://docs.microsoft.com/en-us/windows-server/remote/remote-desktop-services/virtual-machine-recs?context=/azure/virtual-desktop/context/context#recommended-vm-sizes-for-standard-or-larger-environments>
3. YES- Via RemoteApps See <https://docs.microsoft.com/en-us/azure/virtual-desktop/manage-app-groups>

How can you say 1 is no, then go on to confirm Win 7 and Win Srv are supported?

 **Mateusz_M** 2 years, 11 months ago

You probably missed word 'only' in the question. It doesn't support Windows 10 only, it supports different Windows versions.

   upvoted 17 times

 **BinuRaj** 3 years, 3 months ago

It support the following OS: Not just Windows10. So answer to q1 is No.

Windows 10 Enterprise multi-session
Windows 10 Enterprise
Windows 7 Enterprise
Windows Server 2019
Windows Server 2016
Windows Server 2012 R2

They should've made RemoteApps a separate product as traditionally Virtual Desktop has always been used for desktop virtualization.

2. No

Multi-session scenarios are when there's more than one user signed in to a session host virtual machine at any one time. For example, when you use pooled host pools in Azure Virtual Desktop with the Windows 11 Enterprise multi-session operating system (OS), that's a multi-session deployment.

NNY.

"Azure Virtual Desktop lets you run Windows 10 or Windows 11 Enterprise multi-session, the only Windows client-based

"Azure Virtual Desktop lets you use Windows 10 or Windows 11 Enterprise multi-session, the only Windows client-based operating system that enables multiple concurrent users on a single VM. Azure Virtual Desktop also provides a more consistent experience with broader application support compared to Windows Server-based operating systems."

2. NO

MsLearn:

A host pool can be one of two types:

Personal, where each session host is assigned to an individual user. Personal host pools provide dedicated desktops to end-users that optimize environments for performance and data separation.

Pooled, where user sessions can be load balanced to any session host in the host pool. There can be multiple different users on a single session host at the same time. Pooled host pools provide a shared remote experience to end-users, which ensures lower costs and greater efficiency.

  **buiducvu** 1 year, 10 months ago

No - No- Yes

   upvoted 2 times

  **SiddeshBM** 1 year, 10 months ago

Got this question on 24-Dec-2022. Now in the 1st question they asked Windows 10 and Windows 11 only.

   upvoted 6 times

  **SAFM** 1 year ago

"Azure Virtual Desktop lets you use Windows 10 or Windows 11 Enterprise multi-session," I guess the answer should be No because of "Enterprise"
