should be the last one: "is a distinct separate instance of Microsoft Azure"

Microsoft Azure operated by 21Vianet (Azure China) is a physically separated instance of cloud services located in China.

   upvoted 82 times

  Sa_Msa **Highly Voted**  1 year, 6 months ago

it should be D) is a distinct separate instance of Microsoft Azure.

As per MS documents:" Microsoft document says that Azure China has a feature parity gap, but the gap is narrowing" plus "Microsoft Azure operated by 21Vianet (Azure China) is a physically separated instance of cloud services located in China. It's independently operated and transacted by Shanghai Blue Cloud Technology Co., Ltd. ("21Vianet"), a wholly owned subsidiary of Beijing 21Vianet Broadband Data Center Co., Ltd.."

So D makes more sense to me.

1. In China, Azure is operated by Shanghai Blue Cloud Technology Co., Ltd., a wholly-owned subsidiary of Beijing 21Vianet Broadband Data Center Co., Ltd. (abbreviated as "21Vianet"). - so not Microsoft.

2. China's Azure customers will be able to enjoy exactly the same user experiences and service level as customers in other areas.

3. In Azure China Trust Center you can see link to "requests for the GDPR" - so obviously access is not restricted to china.

Azure China "is a distinct separate instance of Microsoft Azure"

   upvoted 1 times

  Nad75 1 year, 7 months ago

I think the answer is correct. Azure China has a feature parity with Azure Global. It is also a physically separated instance of "other Cloud Services in China"..... NOT Microsoft Azure. So B is correct (feature parity)

  williamlamata 1 year, 8 months ago

Answer is D clearly.

What is Microsoft Azure operated by 21Vianet?

Microsoft Azure operated by 21Vianet (Azure China) is a physically separated instance of cloud services located in China. It's independently operated and transacted by Shanghai Blue Cloud Technology Co., Ltd. ("21Vianet"), a wholly owned subsidiary of Beijing 21Vianet Broadband Data Center Co., Ltd..

Microsoft Azure services operated by 21Vianet are a standalone instance, separating from Azure Global services. Therefore, the service availability is not identical to global Azure, however, this does not change the quality of available services.

🗨️ 👤 azirila 1 year, 9 months ago

i think answer is right, read this especially last allien so has same parity with azure And separate instance of azure GLOBAL

In accordance with Chinese regulatory requirements, Azure regions operated by 21Vianet in China are physically separated instances from Microsoft's global cloud but are built on the same cloud technical base as its global peers

🗨️ 👤 Pinha 1 year, 9 months ago

Answer is D

"Feature parity" means "same feature".

Azure China is a version of Microsoft Azure that is operated by 21Vianet, a Chinese internet service provider. It is separate from the global version of Azure and is subject to Chinese laws and regulations. While Azure China and Azure global share many common features, there are some differences in the services and features that are offered.

For example, Azure China offers a subset of the services that are available in Azure global. Some services that are available in Azure global may not be available in Azure China, or may have different capabilities or limitations. In addition, Azure China may have different pricing, billing, and support options compared to Azure global.
