EXAM AZ-900 TOPIC 1 QUESTION 180 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 180

Topic #: 1

[\[All AZ-900 Questions\]](#)

DRAG DROP -

Match the Azure services to the correct descriptions.

Instructions: To answer, drag the appropriate Azure service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point

Select and Place:

**Azure Services**

Azure Machine Learning

Azure Synapse Analytics

Azure IoT Hub

Azure Functions

**Answer Area**

Provides a cloud-based Enterprise Data Warehouse (EDW).

Uses past trainings to provide predictions that have high probability.

Provides serverless computing functionalities.

Processes data from millions of sensors.

Azure Functions is a platform offered by Azure for serverless compute service and this helps in running event-triggered code without even worrying about the infrastructure provisions.

Although it is intuitive to "guess" the correct answers, some topics of this question have been removed from the AZ-900 and added to the AI-900. So, we should not expect such questions in the AZ-900 exam.

Synapse = Enterprise Data  
Predictions = Machine learning (predictions is related to AI)  
Serverless = Functions/Logic apps  
Azure -IoT = Millions of sensors  
👍 🔄 🚩 upvoted 6 times

I hope this is not on the test.  
Azure Synapse helps you store and analyze a lot of information, Azure Machine Learning helps you learn things faster and make decisions based on what you learned, and Azure IoT Hub helps you talk to and control many devices at once.  
  
Hope this helps

Actually, Azure IoT Hub does not PROCESS sensor data. It's just enabling communication between sensors and Azure. But in this situation, whatever... IoT Hub for last box.
