EXAM AZ-900 TOPIC 1 QUESTION 41 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 41

Topic #: 1

[\[All AZ-900 Questions\]](#)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to migrate all its data and resources to Azure.

The company's migration plan states that only Platform as a Service (PaaS) solutions must be used in Azure.

You need to deploy an Azure environment that meets the company migration plan.

Solution: You create an Azure App Service and Azure SQL databases.

Does this meet the goal?

A. Yes

B. No

The statement ask for ONLY PaaS. It is not possible to have only PaaS without IaaS. Then the answer is NO, even if Azure App Service and Azure SQL Database are PaaS.

The question doesn't me too which resources so either this is a yes or question 43 is a yes. For those type of questions there are always 4 scenarios and only one is a yes

correct

   upvoted 1 times

  **nixi** 1 year, 2 months ago

Selected Answer: B

The resources of the company might not only be structured data, so storage account would be better option than Azure SQL Database. There is such answer below

   upvoted 1 times

  **Capzn** 1 year, 2 months ago

this answer is correct on the basis that Azure SQL is a Paas Solution

   upvoted 1 times

  **james2033** 1 year, 2 months ago

Selected Answer: A

Quote "Azure SQL Database is a relational database-as-a-service (DBaaS) hosted in Azure that falls into the industry category of Platform-as-a-Service (PaaS)." at <https://learn.microsoft.com/en-us/azure/azure-sql/azure-sql-iaas-vs-paas-what-is-overview?view=azuresql-vm#azure-sql-database> . Choose A confidently.

Selected Answer: B

A VM with SQL Server installed is IaaS. Hence answer should be NO (B)

   upvoted 2 times

  **Snowman1193** 5 months, 2 weeks ago

It mentions nothing about a VM, there is a Paas offering in Azure that is SQL databases which you don't need to spin up a VM for, that is why it is Paas
