Selected Answer: D

D high availability - is correct answer.

High availability ensures that a system or application remains accessible and operational for a high percentage of time, minimizing downtime and disruptions.

Selected Answer: D

IT'S HIGH AVAILABILITY

   upvoted 1 times

  **Ciupaz** 1 year, 7 months ago

Remember that "High Availability" is a quality of computing infrastructure that is important for mission-critical systems. High Availability permits the computing infrastructure to continue functioning, even when certain components fail.
