EXAM AZ-900 TOPIC 1 QUESTION 57 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 57

Topic #: 1

[\[All AZ-900 Questions\]](#)

Your company has an on-premises network that contains multiple servers.

The company plans to reduce the following administrative responsibilities:

- ⇒ Backing up application data
- ⇒ Replacing failed server hardware
- ⇒ Managing physical server security
- ⇒ Updating server operating systems
- ⇒ Managing permissions to shared documents

The company plans to migrate servers to Azure virtual machines.

You need to identify which administrative responsibilities will be eliminated after the planned migration.

Which two responsibilities should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Replacing failed server hardware
- B. Backing up application data
- C. Managing physical server security
- D. Updating server operating systems
- E. Managing permissions to shared documents

Selected Answer: A

Regarding the fundamental concepts of OPEX (Ongoing Operational Expenditure) and CAPEX (Upfront Capital Expenditure), it is important to understand that obtaining an electricity connection for a data center falls under the category of CAPEX, as it involves an initial upfront investment. On the other hand, paying the electricity bill on a monthly basis for the data center is considered an example of OPEX, as it represents ongoing operational expenses. However, there seems to be some confusion regarding whether paying for electricity in relation to a data center qualifies as an example of OPEX. Can anyone in this forum who has already taken the exam and answered this question correctly provide some clarity on this matter? Your assistance would be greatly appreciated. Thank you to all the members of this forum.

In PaaS, Cloud provider manages the Operating system, then why D is not right???

   upvoted 1 times

  **ajhak** 1 year, 7 months ago

Because they could be using IaaS where managing the OS is on the consumer / shared

  **Wan13** 2 years ago

I found this question confusing, I would give B/E, because I thought it would be migrated, since the server is in trouble, why spend money on the new server, better use azure..
