B

A. deploy a VPN: Depending on your organization's security requirements and the nature of your website, you may or may not need to deploy a VPN to secure your connection between your on-premises network and Azure.

B. pay monthly usage costs: Azure is a pay-as-you-go service, which means that you will be charged based on your usage. You must plan to pay monthly usage costs for the Azure services and resources you use to host your website.
