The answer is definitely wrong. it is Azure Active Directory.
   upvoted 29 times

  **AAsif098** 1 year, 9 months ago
Agreed should be Azure AD
   upvoted 6 times

  **Sa_Msa** 1 year, 6 months ago
No it's correct, it should be Subscriptions.

See below from this link: <https://learn.microsoft.com/en-us/partner-center/assign-azure-subscriptions>

Assign Azure subscriptions to your customers
To assign an Azure subscription to a customer, use the following steps:

In Partner Center, select Customers and then locate the customer you want to manage.

Select the down arrow at the end of the row to expand the customer's record and then select Microsoft Azure Management Portal.

You're directed to the Azure portal where you can manage the customer's subscriptions.

At the Azure portal, select Subscriptions.

Select the subscription you want to assign and then select Access Control.

Select Add to add a user to the subscription.

After you add the user to the subscription, you can assign the user a role and the account to which the user will have access.

The answer is Azure Active Directory.
Why? Because it says you have to CREATE a new user. From Subscriptions, you can associate a previously created user, but it does not allow you to create a new one.
That's the difference...

It's no brainer to understand the difference between „add“ and „create“. This question could be wrong anyway

  **Genichiro** 2 months, 1 week ago
This answer is obviously wrong. I just tested this myself in Azure and you need to go to Microsoft Entra ID > Users > Create new User. So in a current exam the answer would be Microsoft Entra ID.
   upvoted 4 times

  **SupAZ900** 3 months, 2 weeks ago
Now it's MS Entra ID:
"Microsoft Entra ID allows you to create several types of users in your tenant, which provides greater flexibility in how you manage your organization's users."
<https://learn.microsoft.com/en-us/entra/fundamentals/how-to-create-delete-users>

As per Microsoft Learn:

How do I add another user to my Azure subscription?

At the Azure portal, select Subscriptions. Select the subscription you want to assign and then select Access Control. Select Add to add a user to the subscription. After you add the user to the subscription, you can assign the user a role and the account to which the user will have access.

🗄️ 👤 **shehanks** 1 year, 1 month ago

1. At the Azure portal, select Subscriptions.
2. Select the subscription you want to assign and then select Access Control.
3. Select Add to add a user to the subscription.
4. After you add the user to the subscription, you can assign the user a role and the account to which the user will have access.

So I think the answer is Subscription blade.

What should you use to create a new user for an Azure subscription?

At the Azure portal, select Subscriptions. Select the subscription you want to assign and then select Access Control. Select Add to add a user to the subscription. After you add the user to the subscription, you can assign the user a role and the account to which the user will have access.

<https://learn.microsoft.com/en-us/partner-center/assign-azure-subscriptions>

the answer is: Subscriptions (with the Key Image)

🗄️ 👤 **Rajivjain** 1 year, 4 months ago

HERE ANSWER IS: AAD

If You need to create a new user for an Azure subscription - Active Directory

If You need to Add a new user for an Azure subscription - A subscription

🗄️ 👤 **ClaGar** 1 year, 5 months ago

The question is definitely misleading...It is a trap because both Azure AD and Subscriptions..The question as a note : each good answer gives one point but only one is circled in red

🗄️ 👤 **Ekie** 1 year, 6 months ago

AAD as per chatGPT.. the question if how to create user....

👍 ↩️ 🚩 upvoted 1 times

🗄️ 👤 **Nad75** 1 year, 7 months ago

I think the answer should be "Azure Active Directory". IF the question was " You need to ADD a new user TO the subscription, then the answer would be the "Subscriptions" tab. You cannot add a user to the Subscription if the user does not exist on the Azure AD. So you need to CREATE the user on Azure AD first and then you will be able to ADD that user under the Subscriptions tab.
