📄 EXAM AZ-900 TOPIC 1 QUESTION 110 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 110

Topic #: 1

[\[All AZ-900 Questions\]](#)

Your company plans to move several servers to Azure.

The company's compliance policy states that a server named FinServer must be on a separate network segment.

You are evaluating which Azure services can be used to meet the compliance policy requirements.

Which Azure solution should you recommend?

- A. a resource group for FinServer and another resource group for all the other servers
- B. a virtual network for FinServer and another virtual network for all the other servers
- C. a VPN for FinServer and a virtual network gateway for each other server
- D. one resource group for all the servers and a resource lock for FinServer

Why is this being asked for Azure Fundamentals? This kind of question is like for experience. The goal of Azure Fundamentals is only to make you aware of the services it offers and how to navigate the Azure portal.

You're not being asked how to do this, just that you demonstrate a knowledge of virtual networks. Tbh, it's not that hard of a question if you read it through properly.

wow this is question 110 and I have already reached the end of the free questions. Normally you would get about 200. I always buy the rest of the questions but getting only 11 pages for free on this test is a bit mean.

B is correct.

Azure virtual networks provide the 'Isolation and segmentation' networking capability.

Selected Answer: B

The keyword here is "segment".

There was another question asked "What is a feature of an Azure virtual network?". The answer was "isolation and segmentation". So B is the correct one.

The question is asking for network segmentation. The only answer that provides network segmentation is a Virtual Network.
