EXAM AZ-900 TOPIC 1 QUESTION 370 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 370

Topic #: 1

[\[All AZ-900 Questions\]](#)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure subscription that contains the following unused resources:

- ⇒ 20 user accounts in Azure Active Directory (Azure AD)
- ⇒ Five groups in Azure AD
- ⇒ 10 public IP addresses
- ⇒ 10 network interfaces

You need to reduce the Azure costs for the company.

Solution: You remove the unused groups.

Does this meet the goal?

A. Yes

B. No

Removing the unused groups in Azure AD will not significantly reduce the Azure costs for the company, as groups are a low-cost resource in Azure.

To reduce Azure costs, you should consider removing or deallocating other unused resources that are more costly, such as the 20 user accounts in Azure AD, the 10 public IP addresses, and the 10 network interfaces. Removing or deallocating these resources can help to reduce the Azure costs for the company.

You need to read the question carefully. This user is using subscription plan, therefore, delete any group is no effect about the cost.
Correct Ans is remove public IP address
   upvoted 1 times
-   **iedodo** 2 years, 7 months ago
Since AD is tied to licences, both the idea of removing unused Groups and Account won't impact the cost, meaning the IP addresses still sounds the best option
