1. Azure Advisor can generate a list of VM's "NOT" protected by backup -> NO
2. You are aiming for an overall score of 100%, Score INCREASE when implementing recommendations -> NO
3. Microsoft Support is not dependant on recommendations beeing implemented -> NO

Secure score is feature of Azure Security center and not Azure Advisor

   upvoted 2 times

  **projectkamote** 3 years, 3 months ago

azure security advisor is part of azure advisor.

"Azure Advisor also includes your recommendations from Azure Security Center which may include recommendations for additional resource types."

<https://docs.microsoft.com/en-us/azure/advisor/advisor-overview>

1. N

Azure Advisor provides recommendations on virtual machines that are not backed up and will let you enable backup on those virtual machines with just a few clicks.

Azure Advisor does not generate a list of virtual machines that ARE protected by Azure Backup. Azure Advisor does however, generate a list of virtual that ARE NOT protected by Azure Backup. You can view a list of virtual machines that are protected by Azure Backup by viewing the Protected Items in the Azure Recovery Services Vault.

Thanks for breaking it down. This is everybody's confusion when they are upvoting the wrong comment. Your comment should be on the top.

- Azure Advisor DOES provide a list of VMs that are NOT protected by Azure Backup.

- Azure Advisor DOES NOT provide a list of VMs that ARE protected by Azure Backup.
