The answer is correct but the question could be worded better, IE "no longer requires its OWN datacenter"

   upvoted 85 times

  **Boboshlap** 3 years, 7 months ago

Correct, as you can also contract a private cloud from a 3rd party

   upvoted 11 times

  **johnyjohny1** 3 years, 6 months ago

No. The organization itself, as the question specifies, doesn't not require a data center, this is now on Azure responsibility. Couldn't get clearer.

I think extensive rewording is needed. In fact, a PRIVATE cloud can indeed be hosted by a third party. In this scenario, the company would not need its own datacenter. The cloud is PRIVATE if the hardware (no matter who provides it) is dedicated to the company.

I recently took the exam and about 80% of the questions were on my exam.

These are the questions that I could find on this site:

38, 44, 67, 71, 100, 103, 111, 113, 123, 125, 132, 145, 157, 181, 210, 215, 275, 283, 289, 306, 336, 342, 378, 390, 420, 425, 431, 432

In a public cloud

   upvoted 1 times

  **Femmyte** 1 year, 9 months ago

The answer is correct, because if you've already hosted your service in a public cloud you don't need any data center any longer, but to choose a private cloud you will surely need a data center, so the answer is public cloud.

public cloud

   upvoted 1 times

  **TitoChuz** 2 years, 6 months ago

Public cloud: a shared cloud that can be accessed by many organizations and individuals and whose resources are shared amongst them.

Private cloud: a cloud dedicated to only one organization or individual.

Hybrid cloud: a cloud environment containing both public and private cloud options.

It can be public, or private, as a private cloud can also be estored by a could provider like azure, IE, the services they provide to US government only.

Id choose Public just to follow the trend but im not 100% sure.
