3. Each user account in Azure AD can be assigned only one Microsoft 365 license - wrong :

Assign licenses to one user

In the admin center, go to the Users > Active users page.

Select the row of the user that you want to assign a license to.

In the right pane, select Licenses and Apps.

Expand the Licenses section, select the boxes for the licenses that you want to assign, then select Save changes.

Shouldn't the last answer be Y? What's the point of assigning multiple Microsoft 365 licenses? This question is a repeat from an earlier question in which N was chosen as the last answer but that question was about 'licenses'. This one is about 'Microsoft 365 license'

Given answer is correct.

Per this link, admin can assign multiple licenses to the user.
