EXAM AZ-900 TOPIC 1 QUESTION 217 DISCUSSION

Actual exam question from Microsoft's AZ-900

Question #: 217

Topic #: 1

[All AZ-900 Questions]

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your Azure environment contains multiple Azure virtual machines.

You need to ensure that a virtual machine named VM1 is accessible from the Internet over HTTP.

Solution: You modify an Azure Traffic Manager profile.

Does this meet the goal?

- A. Yes
- B. No

	pcce5w2hlh Highly Voted d 4 years, 9 months ago Answer is B. Becoz Traffic Manager is used to distribute traffic at DNS level across different regions. □ upvoted 68 times
	☐ ♣ Clouddog 4 years, 3 months ago https://azure.microsoft.com/nl-nl/resources/videos/how-azure-traffic-manager-works/ which is a clouddog 4 years, 3 months ago https://azure.microsoft.com/nl-nl/resources/videos/how-azure-traffic-manager-works/ which is a clouddog 4 years, 3 months ago https://azure.microsoft.com/nl-nl/resources/videos/how-azure-traffic-manager-works/
	gassen Highly Voted 4 years, 4 months ago just for the future If the Question doesn't raise any question please stop posting comments, it's a source of frustration and Confusion upvoted 56 times
	□ ♣ nick1970 4 years, 1 month ago 100 thumbs up. So true. ↓ ♠ □ upvoted 2 times □ ♣ Enits 3 years, 10 months ago Its good to get broader perspective from different people ↓ ♠ □ upvoted 3 times
	■ MickeyG 4 years, 2 months ago I agree, but only when users just respond with "correct" or "A is correct". This adds nothing for the rest of us. I enjoy having context why options are invalid or valid. But responding with just the letter that is the answer is not helpful to anyone upvoted 12 times
	□ mr_corte 3 years, 3 months ago "correct" □ upvoted 2 times
	□ ♣ Piiri565 4 years, 2 months ago I think comments make the concepts to understand much better, just by knowing the answer and moving to the nex question. Let the people connect . Its the source of Knowledge □ wpvoted 10 times

	Nathan12345 Most Recent ② 1 month, 3 weeks ago Selected Answer: B traffic manager like LB
	Christian_garcia_martin 3 months, 1 week ago you can do that with NGS so answer is not upvoted 1 times
	Christian_garcia_martin 3 months, 2 weeks ago when you create a VM you need to set the NSG to allow traffic under HTTP protocol (for example) in a specific port.
	b274b54 4 months, 1 week ago I cannot find the service "Traffic Manager" in the most recent AZ-900 study guide, I guess we can skip this question upvoted 1 times
	a cristianosilva 1 year, 2 months ago Answer is B

https://learn.microsoft.com/en-us/azure/architecture/guide/technology-choices/load-balancing-overview#decision-tree-for-load-balancing-in-azure/

I believe that the most suitable is to add load balance, according to the documentation. Traffic Manager is used to distribute traffic at DNS level across different regions.

🖃 🚨 Ciupaz 1 year, 7 months ago

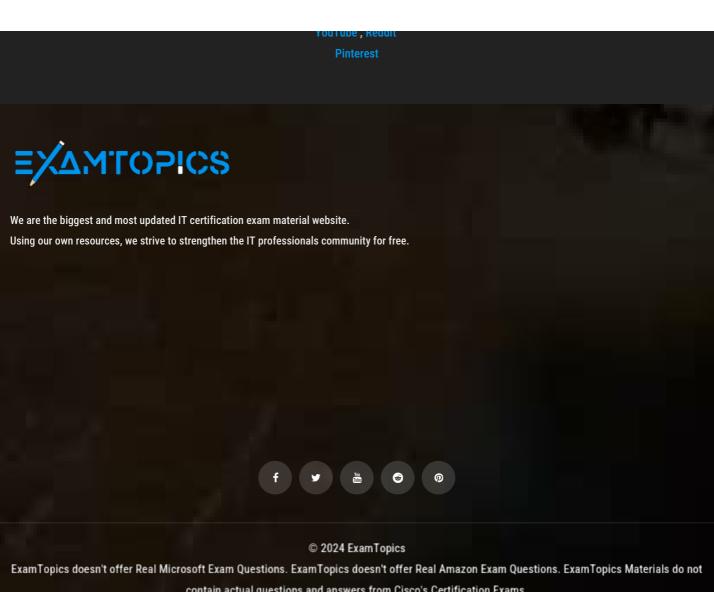

To ensure that a virtual machine named VM1 is accessible from the Internet over HTTP, you need to modify a network security group or Azure Firewall.

In this question, we need to add a rule to a network security group or Azure Firewall to allow the connection to the virtual machine on port 80 (HTTP). • provided 3 times
♣ mufflon 2 years, 10 months ago https://docs.microsoft.com/en-us/azure/virtual-network/network-security-groups-overview ↓ □ upvoted 1 times
La Tonyburg 2 years, 11 months ago Why do you guys repeat the solution when it is correct? Please comment something that actually adds up. An explanation of a link are welcome, the rest is bullsh*t □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □
♣ panal 3 years, 8 months ago Answer is B. ★ □ upvoted 1 times
