   wzlwit 3 years ago

   it seems to conflict with Q203.

   👍 ↩ 🏳 upvoted 3 times

   wzlwit 3 years ago

   it's right, no conflict with Q203

   3 is a trick question where the word JOINED and REGISTERED changes everything!

   https://docs.microsoft.com/en-us/azure/active-directory/devices/concept-azure-ad-register

   https://docs.microsoft.com/en-us/azure/active-directory/devices/concept-azure-ad-join

No, iOS devices cannot be directly registered in Azure Active Directory (Azure AD) in the same way that Windows devices can. Instead, iOS devices are managed through Microsoft Intune, which integrates with Azure AD for managing access and compliance

About Q1, this can be achieved with an Azure AD Application Proxy:
https://docs.microsoft.com/en-us/azure/active-directory/app-proxy/application-proxy#:~:text=Application%20Proxy%20is%20a%20feature,on%20an%20on%2Dpremises%20server.

The first one should be NO.
Only AAD cannot manage the on-premises.

👍 ↩ 🏳 upvoted 1 times

   anass1992 2 years, 9 months ago

   It should be YES: Which features work in Azure AD? > Application management > "Manage your cloud and on-premises apps using Application Proxy, single sign-on, the My Apps portal (also known as the Access panel), and Software as a Service (SaaS) apps".

   Link: https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/active-directory-whatis

   👍 ↩ 🏳 upvoted 5 times

      bipsta 2 years, 9 months ago

      Agreed...should be yes. https://docs.microsoft.com/en-us/azure/active-directory/app-proxy/application-proxy
