📄 **EXAM AZ-900 TOPIC 1 QUESTION 206 DISCUSSION**

Actual exam question from Microsoft's AZ-900
Question #: 206
Topic #: 1
[All AZ-900 Questions]

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure environment. You need to create a new Azure virtual machine from a tablet that runs the Android operating system.

Solution: You use PowerShell in Azure Cloud Shell.

Does this meet the goal?

   A. Yes

   B. No

If you have a tablet why don't you just use the portal GUI to do it instead of typing in a long command in CS. I imagine it's much easier to click instead of type.

Selected Answer: B

Azure Cloud Shell is a browser-based terminal that provides an authenticated, preconfigured shell experience for managing Azure resources. Cloud Shell comes with the tools you need, already installed.

Azure Cloud Shell runs on Azure Linux, Microsoft's Linux distribution for cloud infrastructure edge products and services. You can choose Bash or PowerShell as your default shell. The key id "in Azure cloud Shell" not in portal, so B

SAFM **1 year ago**

Selected Answer: A

Using a browser to launch the Azure portal and then the Azure Cloud Shell

👍 ↩ 🚩 upvoted 1 times

Onin011788 **1 year, 3 months ago**

B. No

The solution described does not meet the goal.

Using PowerShell in Azure Cloud Shell is a valid way to manage and interact with your Azure resources, but the statement specifically mentions creating a new Azure virtual machine from a tablet that runs the Android operating system.

As of my last update in September 2021, Azure Cloud Shell is not available as a native application for Android devices. Azure Cloud Shell is accessible through web browsers on devices like Windows, macOS, and Linux, but there is no official Azure Cloud Shell app for Android.

Therefore, the correct answer is B. No, using PowerShell in Azure Cloud Shell from an Android tablet is not currently possible. To create a new Azure virtual machine from an Android device, you may consider using the Azure portal in the web browser or a third-party app that provides remote access to a computer running PowerShell or the Azure CLI.

👤 **leusa** 2 years, 2 months ago

I missed this question. They key word is "Azure Cloud Shell." So the answer is correct Yes

👍 ↩ 🚩 upvoted 2 times

👤 **maltahri** 2 years, 2 months ago

I believe the answer is A because in the story he did not say the only way is to use Powershell, instead, he made the option open
