No - "1. Private preview – during this phase we invite a few customers to take part in early access to new concepts and features. "
Yes - "2. Public preview – during this phase we allow any customer with the proper Azure AD license to evaluate the new feature. " Maybe this question can be evaluated as NO as it is stating "ny customer with the proper Azure AD license" needs to be confirmed !
No - "3. Generally available (GA) – After the public preview is completed, the feature is open for any licensed customer to use"

　　IMHO second should be YES. How can I use a public preview if my license doesn't include a requirement for the new feature? But it's not restricted to a selected customers group, so is general available.

Makes total sense.
Private preview - sounds like kinda private to me.
Public preview - sounds like kinda public to me.
GA = available for all Azure customers.
