How is this even a question? What policy?

👍 ↩ 🚩 upvoted 32 times

⊟ 👤 **Mozbius_** 2 years, 10 months ago

Yup. Answer is obviously B based on keyword "policy" but the question on its own is straight garbage!

Maybe we have this question in the next exam:
What is the difference between Water?

`Selected Answer: B`

B is the answer.

https://learn.microsoft.com/en-us/azure/governance/policy/overview
Azure Policy helps to enforce organizational standards and to assess compliance at-scale. Through its compliance dashboard, it provides an aggregated view to evaluate the overall state of the environment, with the ability to drill down to the per-resource, per-policy granularity. It also helps to bring your resources to compliance through bulk remediation for existing resources and automatic remediation for new resources.

https://learn.microsoft.com/en-us/training/modules/describe-features-tools-azure-for-governance-compliance/3-describe-purpose-of-azure-policy
Azure Policy is a service in Azure that enables you to create, assign, and manage policies that control or audit your resources. These policies enforce different rules across your resource configurations so that those configurations stay compliant with corporate standards.

An Azure policy is a feature in Azure that allows you to define rules for your Azure resources. These rules can be used to ensure that your resources meet specific requirements, such as compliance standards or company policies. For example, you can create a policy that requires all virtual machines to be in a certain region, or that all storage accounts must use a specific redundancy level. You can assign policies at the subscription, resource group, or resource level.
Once you have created and assigned a policy, Azure evaluates the policy on a regular basis and reports on any resources that do not comply with the policy.
